

Dual Driver

Handmade with 100 percent attention to detail. On our Dual Driver earphones nothing has been compromised. Dual Driver earphones have been developed by our design team in Sweden. Our engineers have succeeded in creating a earphone with perfect balance between treble, bass and mid range for most types of music.

The Range in Sound

Dual Driver give you a true sound in all lows, mid's and high frequencies. The sound is distinct, refined and accurately reproduces all details in your music listening.

The Design

Chose between colors; cool white with a dash of silver or jet black with a dash of gold. The metal Dual Driver housing is designed to fit your ear perfectly and isolate sound to produce a spacious sound.

Two Speakers in each Ear

There is a reason most cheap in-ear earphones sound the way they do: they only use one driver in each ear, which limits the audio range. If you want more life, more spaciousness, and more oomph out of your favorite tracks,

there needs to be two drivers in each ear piece, one that handles treble and one that handles bass. This means that we can finetune both treble and base to optimize the sound.

Take Control of Your Smartphone

With these earphones you'll enjoy fast access music playback control, volume, play-pause and tracking, without having to use your smartphone. Of course all that comes with a feature that enables you to answer and end calls on your smartphone. The high-quality microphone and sound-isolating housing and ear-buds are combined to let you hear and be heard better than ever before. We include multiple types of earbuds, sized to ensure a perfect fit. You will also find other useful accessories included like an airplane adaptor and dual listening adaptor for sharing your music experience with your friends.

Made for Your Favorite Smartphone

Dual Driver comes in a wide range to fit your smartphone brand. Available for Apple iPhone, Samsung, HTC, Nokia and Sony 3.5mm standard smartphones.

PRODUCT NAME

Degauss Labs Dual Driver

FREQUENCY

20 — 20 000 Hz

SPECIAL FEATURE

Double speakers in one casing. Bass and treble

SPEAKERS

6.0 mm dynamic
10.0mm dynamic

EAR COUPLING

In-ear earbuds

MICROPHONE

BUTTON

Yes, start/stop/answer

and volume buttons

MEMS

EARPHONE HOUSING

Aluminum alloy

CABLE TYPE

Flat. Enforced
symmetrical

CABLE MATERIAL

TPE (Thermoplastic
elastomer). Rubber
coated

CABLE DIMENSION

3mm wide, 1mm thick
1250mm tip-to-tip, tangle
free

WEIGHT

16.5g

SPEAKER TYPE

Degauss Dual Driver

INCLUDED EARTIPS

S / M / L / XL / XXL

Variety of materials
included

SOUND PRESSURE

LEVEL

90dB at 1KHz

IMPEDANCE

16ohms

ISOLATION

-42dB@2kHz

CONNECTOR PLUG

L-shaped, gold plated
stereo 3.5mm for all
smartphones

COLOUR

Black & Gold or
White & Silver

CHEMICALS

BPA Free

WARRANTY

1 year

INCLUDED

5 style eartips, dual
listening adaptor, flight
adaptor, owners manual

SUITABLE FOR

Apple iPhone, iPad,
HTC, Samsung, Nokia,
Sony 3.5mm standard
smartphones
